Re: Pretreatment Program
NPDES No. DC0021199

Dear Mr. Bailey:

Thank you for the timely and complete submission of the Authority's annual pretreatment report for calendar year 2011. In general, the report indicates that the Authority continues to have a well implemented pretreatment program that includes several initiatives beyond the standard program requirements.

Thank you also for using the EPA spreadsheet for reporting of the influent, effluent, and sludge data for the reporting year. In reviewing the data, I noted that the Authority's lab reported several pollutants as estimated values (value below the reporting level but above the detection level), but that the Authority reported these values on the spreadsheet as non-detectable results using the reporting level as the detection level. For future reports, the Authority should report these estimated values in the spreadsheet rather than reporting the values as less than the reporting level. In addition, where the lab reports the result as below the detection level, the Authority should report the values as less than the detection level rather than as less than the reporting level.

In reviewing the 2011 annual reports, EPA has continued the program in which specific pretreatment implementation items for each approved program are being tracked. For calendar year 2011, the two measures previously used to track NPDES compliance have been combined into a single measure. In addition, a measure has been added to track POTW compliance with permit schedules for local limits reevaluation. Enclosed is a sheet that includes the data that I have collected for the DCWASA pretreatment program for calendar year 2011, as well as a sheet that provides some additional information on the categories listed. An "Instruction Sheet" that provides more detail on each measure (with any changes from the 2010 measures indicated in bold) is also enclosed. Generally, the category ratings are not directly related to compliance, but "Category 1" would be considered the best rating for each measure. Finally, a summary of all of the POTW data collected for calendar year 2010 has been included to allow you to compare your program to the ratings achieved by POTWs in calendar year 2010.

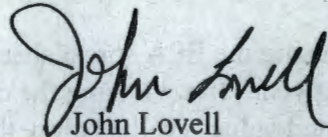

Measures 7 and 10 (SNC rates) are listed in category 2. The Authority's report indicated that several users had significant noncompliance violations during calendar year 2011. Since the number of users in significant noncompliance is not unusually high and the users returned to compliance relatively quickly, this is not considered a significant issue. Of course, the Authority's goal should be to have all of its users consistently in compliance.

Measure 18 (streamlining revisions) is listed in category 2. The Authority has adopted the revisions to its legal authority and is awaiting the final ordinance adoptions from its contributing jurisdictions. When all of the ordinances are available, please provide copies of the adopted documents.

Measure 19 (overall rating) is listed in category 1 with a rating of 94.4. This is a bit lower than the Authority's rating for calendar year 2010 (98.1), but is significantly higher than the average rating received by POTWs in calendar year 2010 (85.8). If the Authority can ensure that the contributing jurisdictions complete the adoption of the streamlining revisions, the overall rating could be increased for next year.

If you have any questions regarding this matter, please contact me at 215-814-5790.

Sincerely,

John Lovell

RE: Update to Pretreatment Program 2011 Annual Report
NPDES No. DC0021199

Dear Mr. Lovell:

Enclosed is a revised page 1 of the Part A Section II Attachment for the combined Blue Plains Advanced Wastewater Treatment Plant (AWTP) users. Loudoun Water made a revision to the number of self-monitoring sampling events conducted by their Significant Industrial Users. Also enclosed is a revised Part A Attachment for Section 4 from Loudoun Water.

In addition, the proof of publications from the DC Water and Sewer Authority (DC Water), Washington Suburban Sanitary Commission (WSSC), and Loudoun Water for Significant Noncompliance (SNC) violators in 2011 are also enclosed. The Loudoun Water notice appeared in The Washington Post on March 3, 2012, and included Engineer Design Manufacturing Services (EDMS). The DC Water notice appeared in The Washington Post on March 29, 2012, and included Amtrak High Speed Rail and Capitol Power Plant. The WSSC notice appeared in The Washington Post on April 5, 2012, and included the Washington Metropolitan Area Transit Authority at Shady Grove and another facility that does not discharge to the Blue Plains AWTP.

If you have any questions or need additional information, please contact Elaine Wilson at 202-787-4177.

Sincerely,

Walter F. Bailey

825 Bids & Proposals
Lord Fairfax Community College Advertising for Professional Services RFP#: 298-12-007
Lord Fairfax Community College is seeking proposals from a qualified firm, and through competitive negotiations, to establish a contract to provide a vendor managed pay-for-print management system.
Scope of Services:
The College is seeking a vendor managed pay-for-print management solution, at multiple locations, which (1) contains printing costs for the campus; (2) provides fair and equitable access to print services in the most cost-effective and student-centered manner; and (3) reduces waste by providing financial and educational incentives to conserve resources. The College's overall goal in soliciting a contractor to provide the system is to enhance and improve upon the level of financial effectiveness, services and satisfaction currently being provided on campus.
The RFP and additional information may be obtained on Virginia's Electronic Procurement website (eVA) at www.eva.virginia.gov. If a hardcopy is needed, please submit a written request to:
Anastasia Triplett, Procurement Officer
Lord Fairfax Community College
173 Skirmisher Lane
Middletown, Virginia 22645
Fax 540-868-4143
E-mail: atriplett@lfc.edu
Proposals shall be delivered to the above address, no later than 2:00 p.m., local prevailing time, on March 29, 2012.
eVA Vendor Registration: The bidder or offeror shall be a registered vendor in eVA.
Owner: Commonwealth of Virginia
State Board of Community Colleges

REQUEST FOR PROPOSALS LANDSCAPING SERVICES
The District of Columbia Department of General Services (DGS) is seeking one or more contractors to provide grounds maintenance and landscaping service for District government facilities.
The scope of services is further outlined in DGS' Request for Proposals (RFP) and generally includes the provision of scheduled, routine mowing, fertilization and general grounds maintenance, as well as additional landscaping services as required. Firms interested in being considered must submit a proposal in accordance with the requirements set forth in the RFP. The RFP may be obtained by writing to Thomas D. Bridenbaugh, Leftwich & Ludaway, 1400 K Street, NW, Suite 1000, Washington, DC 20005, or by faxing a written request on the firm's letterhead to Thomas D. Bridenbaugh at (202) 783-3420, or by sending an email to kallidasan@leftwichlaw.com. Proposals shall comply with the requirements as designated in the RFP and must be received as designated in the RFP no later than 2:00 p.m. on March 20, 2012.

REQUEST FOR PROPOSALS ROOF REPLACEMENT AT WINSTON EDUCATION CAMPUS
The District of Columbia Department of General Services (DGS) is seeking proposals from contractors who wish to be considered to replace the roof at the Winston Education Campus located at 3100 Erie Street, SE, Washington DC.
The scope of services is further outlined in DGS' Request for Proposals (RFP) and generally includes replacing the roof at the school. Firms interested in being considered must submit a proposal in accordance with the requirements set forth in the RFP. The RFP may be obtained by writing to Thomas D. Bridenbaugh, Leftwich & Ludaway, 1400 K Street, NW, Suite 1000, Washington, DC 20005, or by faxing a written request on the firm's letterhead to Thomas D. Bridenbaugh at (202) 783-3420, or by sending an email to kallidasan@leftwichlaw.com. Proposals shall comply with the requirements as designated in the RFP and must be received as designated in the RFP no later than 2:00 p.m. on March 29, 2012.

**WASHINGTON SUBURBAN
SANITARY COMMISSION
PUBLIC NOTICE OF SIGNIFICANT
INDUSTRIAL USER
POLLUTION VIOLATION (S)**

In accordance with the General Pretreatment Regulations (40 CFR 403), the Washington Suburban Sanitary Commission (WSSC) administers the Industrial Discharge Control Program to regulate the discharge of pollutants to the sanitary sewers in Prince George's and Montgomery Counties. This Program's purpose is to protect the environment, to prevent operational interference at WSSC's wastewater treatment plants, to prevent the pass through of pollutants into the waterways of the State of Maryland, and to ensure the quality of treatment plant sludge.

During calendar year 2011, the following Industrial Users were found to be in significant non-compliance, as defined in 40 CFR 403.8 (f) (2) (vi), with the United States Environmental Protection Agency's national pretreatment standards and/or WSSC's Industrial and Special Waste Regulations.

Beretta USA Corporation, located at 17401 Beretta Drive, Accokeek, MD, violated the federal monthly average limitation for chromium for the month of November 2011. This violation constitutes significant non-compliance (Technical Review Criteria). Enforcement Action included a Notice of Violation, a Directive and additional monitoring. Compliance is pending.

Washington Metropolitan Area Transit Authority (Shady Grove), located at 15903 Somerville Drive, Rockville, MD, violated the local copper limitation on March 7, 2011. This violation constitutes significant non-compliance (Technical Review Criteria). Enforcement Action included a Notice of Violation, a Directive, and additional monitoring. Washington Metropolitan Area Transit Authority (Shady Grove) has returned to compliance for copper.

RE: Pretreatment Program 2011 Annual Report
NPDES No. DC0021199

Dear Mr. Lovell:

Enclosed is the DC Water and Sewer Authority's (DC Water) 2011 Annual Pretreatment Program report. The report is arranged as follows:

2011 Annual Report Parts A and B for Blue Plains Advanced Wastewater Treatment Plant (AWTP) Users with the following attachments:

Attachment 1 – Part A with attachments for Significant Industrial Users (SIUs) in the District of Columbia;

Attachment 2 – Parts A and B with attachments for Washington Suburban Sanitary Commission (WSSC) SIUs discharging to Blue Plains;

Attachment 3 – Parts A and B with attachments for Fairfax County Department of Public Works SIUs discharging to Blue Plains;

Attachment 4 - Parts A and B with attachments for Loudoun Water SIUs discharging to Blue Plains;

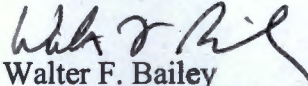

Attachment 5 – Part A for the Town of Vienna; and

Attachment 6 – Quarterly influent, effluent, and biosolids data (local limits), and annual influent and biosolids data (priority pollutants).

Mr. John Lovell

Issuance Date	08/31/10		Expiration Date	09/30/15	
Total CIUs	12		Total MTCIUs	0	
Total SNIUs	39		Total NSCIUs	0	

CIUs - Categorical Industrial Users

MTCIUs - Middle Tier Categorical Industrial Users

SNIUs - Significant Noncategorical Industrial Users

NSCIUs - Nonsignificant Categorical Industrial Users

II. Compliance Monitoring Program

1. No. of SIUs with current Control Documents.....	51
2. No. of SIU Facilities Inspected.....	55
3. No. of SIU Facilities Sampled.....	53
4. No. of SIUs Submitting Self-Monitoring Reports.....	51

III. Significant Industrial User Compliance

1. No. of SIUs Violating a Compliance Schedule / No. on a Schedule.....	0/1
2. No. of SIUs in SNC for the July to December Period.....	0
3. No. of SIUs in SNC At Any Time During the Calendar Year.....	4
4. No. of SIUs in SNC That Were Also in SNC During the Previous Calendar Year	0
5. No. of NSCIUs that violated any standards or requirements	NA

IV. Enforcement Actions

1. Notices/Letters of Violation Issued to SIUs.....	27
2. Enforceable Compliance Schedules Issued to SIUs.....	11
3. Civil/Criminal Suits Filed.....	0
4. No. of SIUs from which Penalties have been Collected.....	0
5. Other Actions (sewer bans, etc.).....	0

I certify that the information contained in this report and attachments is complete and accurate to the best of my knowledge (see Part B.V of the instructions).

Section I Attachment (continued)
Summary of Blue Plains AWTP Significant Industrial Users

Additions to the 2010 List of Industrial Users:

1. Greenpenz, 2600 Virginia Ave., LLC (DC Water) – purchased hotel from Bentley Forbes Watergate in November 2011.
2. United Therapeutics Corp. (WSSC) – new SIU as of 8/30/11, no production in 2011.
3. Human Genome – Traville (WSSC) - new SIU as of 8/10/11.

Deletions to the 2010 List of Industrial Users:

1. Baxter Health Care Corp. (WSSC) – no longer in operation as of January 17, 2011.
2. Bentley Forbes Waterage (DC Water) – sold hotel in November 2011.
3. GSA West – no longer permitted as of June 2011 (ceased discharging in 2000).
4. Walter Reed Army Medical Center – ceased discharging in September 2011.
5. Washington Gas – reclassified as a Non-Significant Industrial User in December 2011.

(1) Original permit issuance dates.

(2) Number of sampling events for pH only. Required daily, when discharging.

(3) Greenpenz bought the Watergate Hotel from Bentley Forbes in November 2011 and has a <3 year permit due to potential disconnection of the groundwater remediation system from the sanitary sewer. All inspections and monitoring at this facility were conducted prior to November 2011 under Bentley Forbes ownership.

(4) Fairfax County conducts all sampling for this IU and does not require self-monitoring.

(5) MWAA Dulles Airport is required to conduct daily monitoring on the glycol discharge. Discharged 8 times during 2011.

PART B
PRETREATMENT DEVELOPMENTS

I. Summary of POTW Operations

1. The Blue Plains Wastewater Treatment Plant had one NPDES violation in 2011 that was not attributable to industrial waste discharges. The plant effluent had a detectable chlorine residual for five hours from October 14, 2011 at 2000 through October 15, 2011 at 0100, ranging from 0.05 to 0.65 mg/L, due to operational error. There were no other permit violations in 2011.
2. As required by the NPDES permit, plant influent, effluent, and biosolids data for all local limit parameters are submitted to EPA Region III on a quarterly basis with the Discharge Monitoring Reports (DMRs) by the 28th day of the following month. Additionally, a complete priority pollutant scan is conducted annually on the influent and biosolids. The 2011 influent, effluent, and biosolids concentrations for the local limit pollutants are provided in a summary table in Attachment 6. The annual priority pollutant scan and additional data collected, but not documented in the summary table, are also provided in Attachment 6. Influent values are calculated based on an estimated flow-weighted average of three contributing waste streams and are reported as "<" if at least one of the individual waste streams was non-detect for that parameter. Influent goals are based on EPA Region III's evaluation of DC Water's local limits published in the DC Register on September 10, 2010. Influent goals were consistently met in 2011, and influent pollutant concentrations have remained fairly consistent with minor fluctuations.
3. DC Water currently accepts hauled waste from domestic, commercial, and pre-approved industrial sources at the headworks to the Blue Plains Wastewater Treatment Plant. Additional hauled waste is received from WSSC and Fairfax County at designated septage receiving stations. Table B-1 summarizes the hauled waste contributions to the Blue Plains Wastewater Treatment Plant. Loudoun Water closed their septage receiving station that discharged to the Potomac Interceptor (and ultimately to Blue Plains) in January 2009 and currently only accepts hauled waste at their Broad Run Wastewater Reclamation Facility. No brine wastes (oil and gas drilling wastes) are accepted at any of the designated septage receiving stations.

All jurisdictions require waste hauler permits, although in Fairfax County, the permit is issued by the Health Department. As of December 31, 2011, DC Water had 18 permitted waste haulers and WSSC had 38 permitted waste haulers. DC Water permits require manifest forms, documenting the source and volume of each load, be submitted prior to receiving access to the facility to discharge.

PART B (Continued)
PRETREATMENT DEVELOPMENTS

I. Summary of POTW Operations (Continued)

Table B-1. Summary of Hauled Waste Discharged to Blue Plains

Jurisdiction	Discharge Site	Sources of Wastewater	Estimated Volume/Mo.	Controls on Users
DC Water	Blue Plains WWTP	Domestic and commercial (portable toilets, domestic holding tanks, grease trap, and storm runoff) Industrial – Washington Gas drip water	645,426 gal/mo (243 loads) <2,000 gpd	Manned site, permits, manifests, random sampling, self-monitoring (drip water)
WSSC	Muddy Branch	Domestic and commercial (portable toilets, septic tanks, and grease trap waste)	Unknown	Permits, restricted hours, surveillance cameras, fines, self-monitoring (sludge)
WSSC	Tanglewood	Domestic	Unknown	Permits, restricted hours, surveillance cameras, fines
WSSC	Montgomery Co. Solid Waste Disposal Site	Industrial - Oaks Sanitary Landfill leachate	Approx 500,000 gal/mo. 80,000 gpd max	•SIU permit
Fairfax Co.	Colvin Run	Domestic and commercial (67% septic tanks, 29% portable toilets, 3% grease trap waste from restaurants, and 1% car washes)	1,000,000 gal/mo (est.) (530 loads)	Permits (Health Dept), restricted access, random sampling

Domestic sources of wastewater are primarily septic holding tanks and portable toilets. The majority of commercial wastewater is from grease traps. Other commercial sources of wastewater are storm runoff (from an off-site biosolids storage facility and maintenance of water quality catch basins) and car washes. Industrial sources of wastewater are drip water from Washington Gas (<2,000 gpd) and landfill leachate from Oaks Sanitary Landfill (80,000 gpd max). Washington Gas is not permitted as a Non-Significant Industrial User for their drip water, but quarterly self-monitoring and reporting of the drip water was required in their waste hauler permit (Washington Gas is no longer permitted as a Waste Hauler as of 1/22/12). Oaks Sanitary Landfill is permitted as a Significant Industrial User by WSSC and the permit contains requirements for monitoring, reporting, and pretreating their waste.

PART B (Continued)
PRETREATMENT DEVELOPMENTS

I. Summary of POTW Operations (Continued)

3. The amount of wastewater received from waste haulers discharging at the Blue Plains Septage Receiving Facility during 2011 ranged from 338,564 gallons per month (172 loads in June) to 1,322,825 gallons per month (387 loads in September), with an average monthly discharge of 645,426 gallons (243 loads). Random sampling is conducted by DC Water on the hauled waste to characterize the waste and to help ensure that hazardous waste is not being brought onto the plant by these waste haulers. Five samples were collected by DC Water and analyzed for pH, oil and grease, total metals, and conventional pollutants in 2011. Trucked waste must meet local limits. Three notices of violation were issued to haulers in 2011 for exceedances of local limits. Two of five random samples collected by DC Water and one of three self-monitoring samples collected by Washington Gas resulted in violations of pretreatment local limits.

Many of the SIUs within the District have waste hauled off-site for disposal. Table B-2 summarizes the information updated during the 2011 inspections. Recycled wastes including used oil, fryer oil, and silver recovery waste is not included in this table.

II. Pretreatment Program Changes

Staffing, Funding, and Local Limits

There was no change in staffing or funding of the District's pretreatment program in 2011. There were no changes to the local limits approved by EPA Region III on May 25, 2010 and adopted by DC Water in a Final Rulemaking published on September 10, 2010.

Streamlining Changes

DC Water and the User Jurisdictions are either in the process of drafting or adopting the required changes or have finalized the required changes in response to the streamlining amendments promulgated by EPA, as discussed below:

- DC Water published the Proposed Rulemaking for the Wastewater Discharge Regulations (21 DCMR Chapter 15) in May 20, 2011. Public comments were received during the 60-day public comment period and substantive changes were made. The regulations were published again as a Proposed Rulemaking on November 11, 2011. No changes were made following this 60-day public comment period and the Board of Directors approved the regulations for Final Rulemaking on February 2, 2012. The Final Rulemaking was published in the DC Register on February 10, 2012 and submitted electronically to EPA Region III. In addition, the Final Rulemaking for the Wastewater Discharge Regulations, the 2010 Wastewater System Regulation Amendment Act, and revised Enforcement Response Plan will be submitted to EPA Region III in DC Water's final pretreatment program modification package.

PART B (Continued)
PRETREATMENT DEVELOPMENTS

Table B-2. Summary of Hauled Waste from SIUs in the District

Type of Hauled Waste	Description of Operations that Generate the Waste	Name(s) of Facilities Used by SIUs for Waste Disposal and Disposal Location (if known)
Oily wastewater/ pretreatment sludge and other non-hazardous waste	Maintenance cleaning activities, treatment residuals	Ace Env (A2Z/Baltimore, MD) A2Z (Env. Recover/Lancaster, PA or Spirit Services/Williamsport, MD) Capitol Tank and Drain Clean Harbors (Baltimore, MD/Reidsville, NC) Clean Ventures (Cycle Chem/Lewisbury, PA) Combs Industrial Services (Nashville, TN) EMSI (Env Enterprises/Cincinnati, OH) Magnolia Plumbing (Metrex/Hyattsville, MD) Marcor Remed (Cycle Chem/Lewisbury, PA) Safety Kleen (Manassas, VA) Tri County Industries (FCC/Wilmington, DE) Water Depot (CWT in New Windsor, MD)
Grease trap waste	Cafeteria cleaning activities	Action Tank and Drain Adams Liming and Septic Tank (Fairfax, VA) B&P Environmental (DC Water) Env Septic and Waste Services (WSSC) Magnolia Plumbing (WSSC) McDevitt and Sons (WSSC) Roto-rooter (Back River WWTP, MD) Sharps Pumping and Septic (UOSA, VA)
Spent car wash reclaim	Vehicle cleaning activities	Adams Liming and Septic Tank (Fairfax, VA) Capitol Tank and Drain
Bucket wash solution	Cleaning of paint drums	Dupont/Chamber Works (Deepwater, NJ)
Hazardous waste	Cleaning, lab waste, solvent use, etc.	Clean Harbors (Baltimore MD/Reidsville, NC) Clean Ventures (Cycle Chem/Lewisbury, PA) EMSI (Env Enterprises/Cincinnati, OH) Marcor Remed (Cycle Chem/Lewisbury, PA)
Radioactive waste	Research, hospital waste	Radiation Service Organization (FL, SC, or TX) New World Tech (Barnwell, SC or FL)

PART B (Continued)
PRETREATMENT DEVELOPMENTS

- The 2011 WSSC Plumbing & Fuel Gas Code became effective on July 1, 2011. This code has not previously been submitted to EPA Region III; however, it is available on their website at <http://www.wsscwater.com/home/jsp/content/plumb-gas-code.faces>, and will be submitted to EPA Region III in DC Water's final pretreatment program modification package.
- The Fairfax County Code, Chapter 67.1 Sanitary Sewers and Sewage Disposal, has incorporated required Pretreatment Streamlining changes and was approved and adopted by the Fairfax County Board of Supervisors on October 19, 2010. The Fairfax County Code, Chapter 67.1 Sanitary Sewers and Sewage Disposal, is available on the internet at http://library.municode.com/HTML/10051/level3/FACOCO_CH67.1SASESEDI_ART1_GEPR.html and will be submitted to EPA Region III in DC Water's final pretreatment program modification package.
- Loudoun Water is currently working with a consultant to draft proposed ordinance changes to incorporate the required streamlining changes and will work with Virginia DEQ and DC Water to ensure these regulations are adequate and compatible with DC Water's regulations. The final regulations will be submitted to EPA Region III in DC Water's final pretreatment program modification package.

III. Miscellaneous Developments

Control of Batch Discharges During Wet Weather

As part of the CSO Nine Minimum Controls, DC Water is required by NPDES permit to 1) use pretreatment regulations to control any industrial discharges that may be identified as impacting CSOs and 2) to require permitted SIUs discharging directly to the CSS to establish management practices to control batch discharges during wet weather conditions whenever possible.

There are seven (7) SIUs that currently discharge directly to the combined sewer system. A list of these facilities is provided in Table B-3. Each facility has a permit requirement to prepare an annual report identifying all batch discharges to the combined sewer system, with the exception of the Watergate Hotel, currently known as Greenpenz, 2600 Virginia Ave., LLC, which is only permitted for the groundwater remediation system and has a continuous operation. These annual reports were due March 31, 2011. Following DC Water review, it was determined that all SIU discharges were either continuous or intermittent and that none of these discharges met the definition of a batch discharge. Some facilities have voluntarily developed management practices to minimize intermittent discharges during wet weather, but DC Water is not requiring development of management practices to control intermittent discharges at this time, since no pollutants of concern in combined sewer overflows have been attributed to these discharges.

PART B (Continued)
PRETREATMENT DEVELOPMENTS

Table B-3. Significant Industrial Users Discharging Directly to Combined Sewers

#	Permit No.	Industrial User	Facility Address	Batch/Intermittent Discharges
1	011	Amtrak	1401 W Street, NE Washington, DC 20018	Train Wash
2	054	Amtrak – High Speed Rail	1401 W St., NE Washington, DC 20018	Train Wash
3	039	Greenpenz (formerly Bentley Forbes Watergate)	2500 Virginia Ave., NW Washington, DC 20037	None (no report required groundwater only)
4	022	Capitol Power Plant	N. Jersey Ave & E St., SE Washington, DC 20003	None
5	029	Linens of the Week	713 Lamont Street, NW Washington, DC 20010	None
6	053	WMATA Brentwood Yard	601 T Street, NE Washington, DC 20018	Steam Cleaning
7	005	WMATA Northern Garage	4615 14th Street, NW Washington, DC 20011	Steam Cleaning/Bus Wash

WMATA = Washington Metropolitan Area Transit Authority

Pollution Prevention

DC Water has incorporated pollution prevention (P2) surveys into the routine annual inspections of SIUs. P2 surveys are conducted every two years and significant P2 accomplishments or deficiencies may be noted annually in the inspection report. These surveys were last conducted in 2010. DC Water has ongoing public education efforts to reduce influent mercury concentrations including distribution of a wastewater management guidance document for the health care industry, inspection and permitting of additional hospitals in the area (as Non-Significant Industrial Users), and adoption of mercury amalgam Best Management Practices for dental facilities.

WSSC worked on a number of pollution prevention initiatives in 2011 including the following:

- Hospital and Healthcare Facility Waste Best Management Practices; and
- Power Washing Best Management Practices.

PART B (Continued)
PRETREATMENT DEVELOPMENTS

Industrial User Survey

DC Water is actively surveying, sampling, and/or inspecting non-permitted commercial/ industrial users to determine whether facilities should be permitted and assist them in conforming to the District of Columbia municipal regulations on wastewater discharges. DC Water has developed a network of contacts at other agencies in the District of Columbia to obtain information on potential violators including the District Department of Public Works, the Mayor's Neighborhood Service Coordinators, and the District of Columbia Department of the Environment Hazardous Waste and Water Quality Divisions. In addition, DC Water periodically reviews queries of commercial and federal accounts for new connections and users that consume more than 25,000 gpd of water.

Temporary Discharge Authorizations

DC Water issued 40 Temporary Discharge Authorization (TDA) permits in 2011 for discharges to the sanitary or combined sewer system consisting primarily for construction dewatering, façade cleaning, and other miscellaneous discharges. The maximum permit term is two years. Most of these permits require periodic self-monitoring, depending on flow and the characteristics of the wastewater discharge.

IV. Signatory Requirements

The Assistant General Manager (AGM) of Wastewater Treatment has signed Part A of this report. This individual is directly responsible for wastewater treatment plant operations and has been authorized to sign the report by the General Manager (written authorization letter dated November, 1, 2011, and previously submitted to EPA Region III).

Section I Attachment (Continued)
District of Columbia Significant Industrial Users

Additions to the 2010 List of Industrial Users:

1. Greenpenz – new owner of the Watergate Hotel as of November 2011.

Deletions to the 2010 List of Industrial Users:

1. Bentley Forbes Watergate – sold hotel in November 2011.
2. GSA – West – no longer permitted as of June 2011 (ceased discharging in 2000).
3. Walter Reed Army Medical Center – ceased discharging in September 2011.
4. Washington Gas – reclassified as a Non-Significant Industrial User in December 2011.
